STORAGE & EFFICIENCY SYSTEMS

Put Your Storage Upgrade *to Work at Tax Time*

Flexopodz sleeve and plate storage, carts, InkPodz and FlexOpz software can make your plateroom and pressroom faster and more organized. Under current federal law, they may also let you **write off the entire purchase in the year you put it to work**, not over several years.

Section 179 Expensing
$2.56M
2026 limit for electing to expense qualifying equipment and off-the-shelf software. It phases out dollar for dollar once total qualifying purchases exceed **$4.09M**. The deduction can't exceed your taxable business income.

Bonus Depreciation
100%
Made permanent by the 2025 One, Big, Beautiful Bill Act for qualified property acquired and placed in service after Jan. 19, 2025. There is no dollar cap, and it isn't limited to taxable income.

Standard 5-Year MACRS
20%
Year-one rate under the half-year convention for 5-year property. Without expensing, you recover the cost gradually over 6 tax years instead of deducting it all up front.

FlexOpz Software
36 mo.
Purchased off-the-shelf software qualifies for Section 179 and bonus depreciation. If you don't expense it, you amortize it straight-line over 36 months. Subscription (SaaS) fees are generally treated as an ordinary business expense instead.

What a Flexopodz System Could Save You in Year One

ILLUSTRATIVE ESTIMATE

System investment	Sec. 179 / 100% bonus first-year deduction	Year-one federal tax savings @ 21%	Standard 5-yr MACRS year-one deduction	MACRS year-one tax savings @ 21%	Extra first-year tax savings
$50,000	$50,000	**$10,500**	$10,000	$2,100	**+$8,400**
$250,000	$250,000	**$52,500**	$50,000	$10,500	**+$42,000**
$750,000	$750,000	**$157,500**	$150,000	$31,500	**+$126,000**
$1,500,000	$1,500,000	**$315,000**	$300,000	$63,000	**+$252,000**

Assumptions: C-corporation at the 21% federal rate. Equipment placed in service in 2026 and fully eligible. MACRS uses the 200% declining-balance method with the half-year convention for 5-year property (20%). If more than 40% of your year's equipment is placed in service in Q4, the mid-quarter convention applies and drops year-one 5-year MACRS to 5%, which makes expensing even more valuable. Total deductions over the asset's life are the same either way. Expensing moves them up front. State taxes, pass-through rates and financing are not included.

Order Now: The Clock Runs Out Dec. 31

- **Buying it isn't enough. It has to be *placed in service,*** meaning installed and ready for its assigned use, by your tax year-end (Dec. 31 for calendar-year companies).
- Equipment that arrives or is installed in January counts toward **next** year's taxes.
- Bonus depreciation also requires the equipment to be acquired after Jan. 19, 2025. A binding contract signed before that date disqualifies it.
- Allow time for lead time, delivery and setup. Talk to us this month.
